Foreword

This book is actually is going to continue the History Of the armenian civilization. In my last books,” History of Armenian Science and Technology” a concise account is presented about thousands of years of Armenian contribution to the National and international science.

In the presents volumes, efforts are done to present thousands of Armenian Humanities and culture during the last thousands of years.

The rich historical past of Armenia and the Armenian people is marked by exceptionally fruitful, original and multifaceted activities in the field of science, culture and education.

Since English readers may need to know Armenia in a bit more details, I have included a brief history of Armenia in the beginning of the book before main body of the research.

One other note is necessary to mentiona aboy Armenain surnames. Traditionary there end up with **-ian** ((Armenian **-եան** specially in Armenian Diaspora) but in the Republic of Armenia they are ending with **-yan** (Armenian **-յան**), so for our respect for Armenian independent Statehood, I have used the State official method in general.

I would appreciate any comments and suggestions to my potential errors, for them I need to apologize and will do my best to improve the quality of this research for next printings.
